SPROUT · MEADOW · DESIGN OVERVIEW

sprout

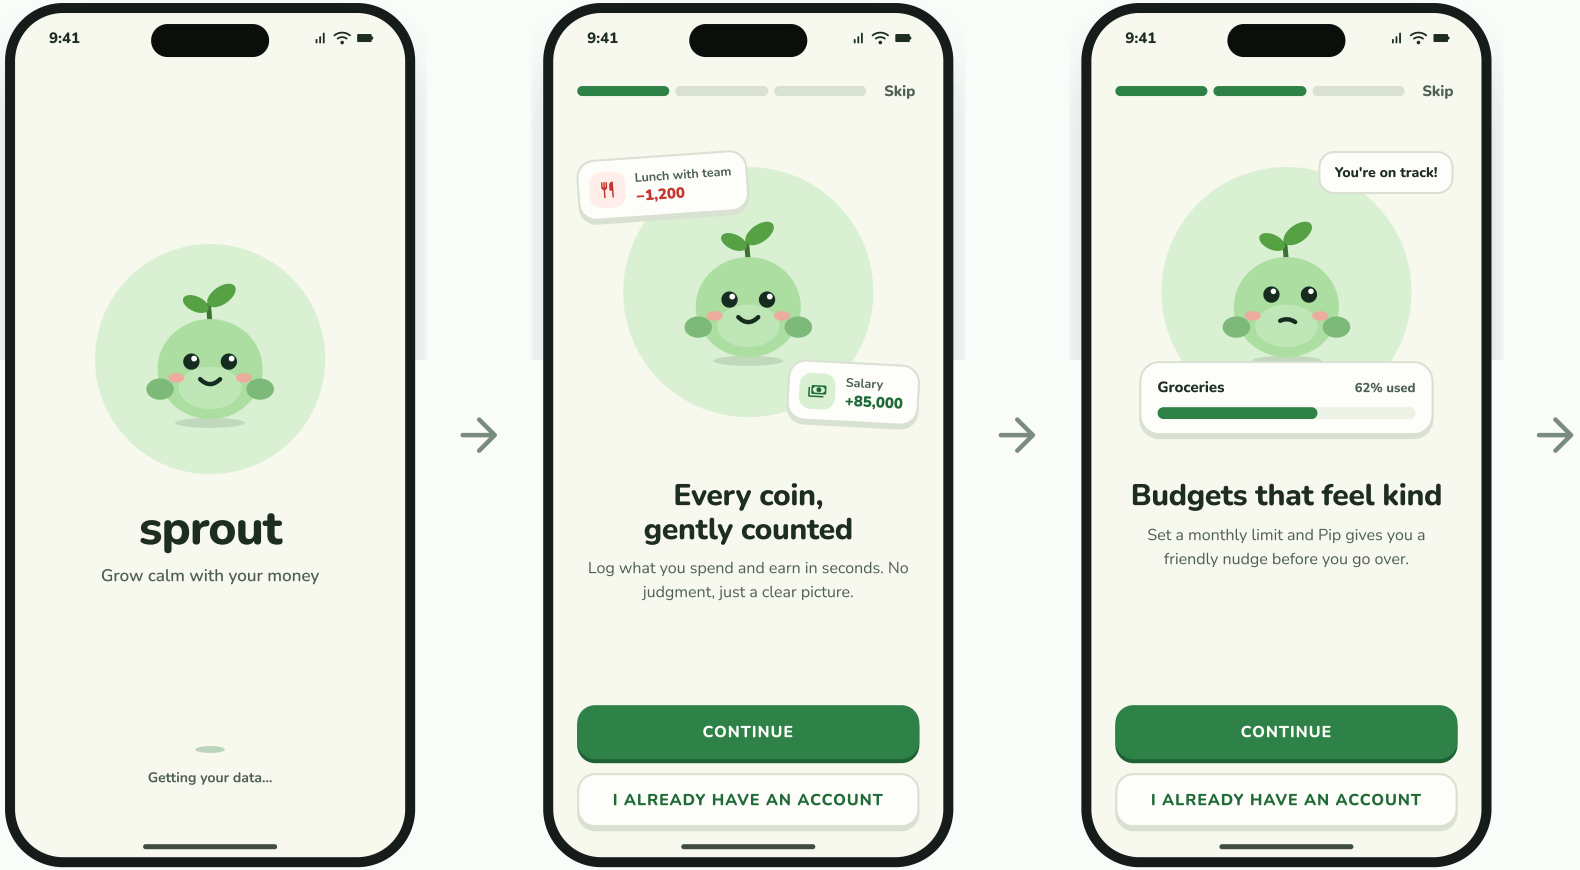

Every implemented screen, flow, loading state, animation and core component of the expense tracker redesign. Pip the seedling is the guide; goals grow like plants. Every phone below is the live prototype, so you can click through it.

Flows

Grouped by journey, in the order a user meets them. Arrows show the main path; open SproutPrototype.dc.html to click through the whole app with the screen jumper.

1 · Welcome, sign up and sign in

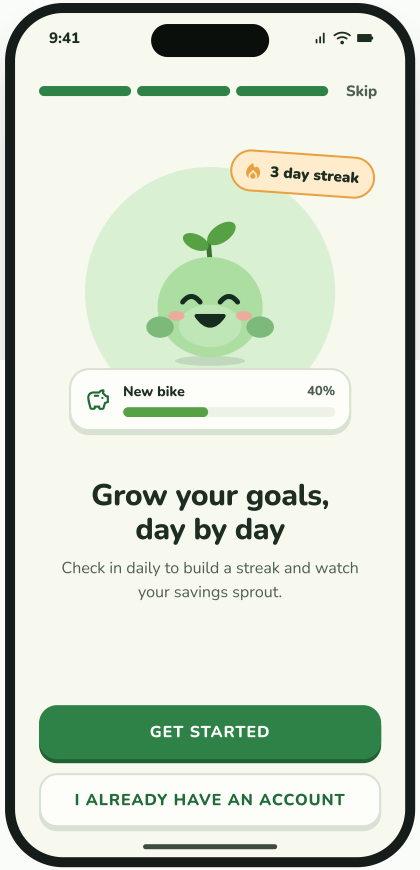

Splash with the sprout loader, three onboarding steps, account creation with a strength meter and inline errors, email confirmation, sign in (Pip covers his eyes on password focus, shakes on errors), password reset, currency setup and the streak welcome.

2 · App lock

PIN pad with chunky keys; Pip covers his eyes while you type, shakes on a wrong PIN and smiles on unlock. Fingerprint key unlocks instantly. Demo PIN is 1234.

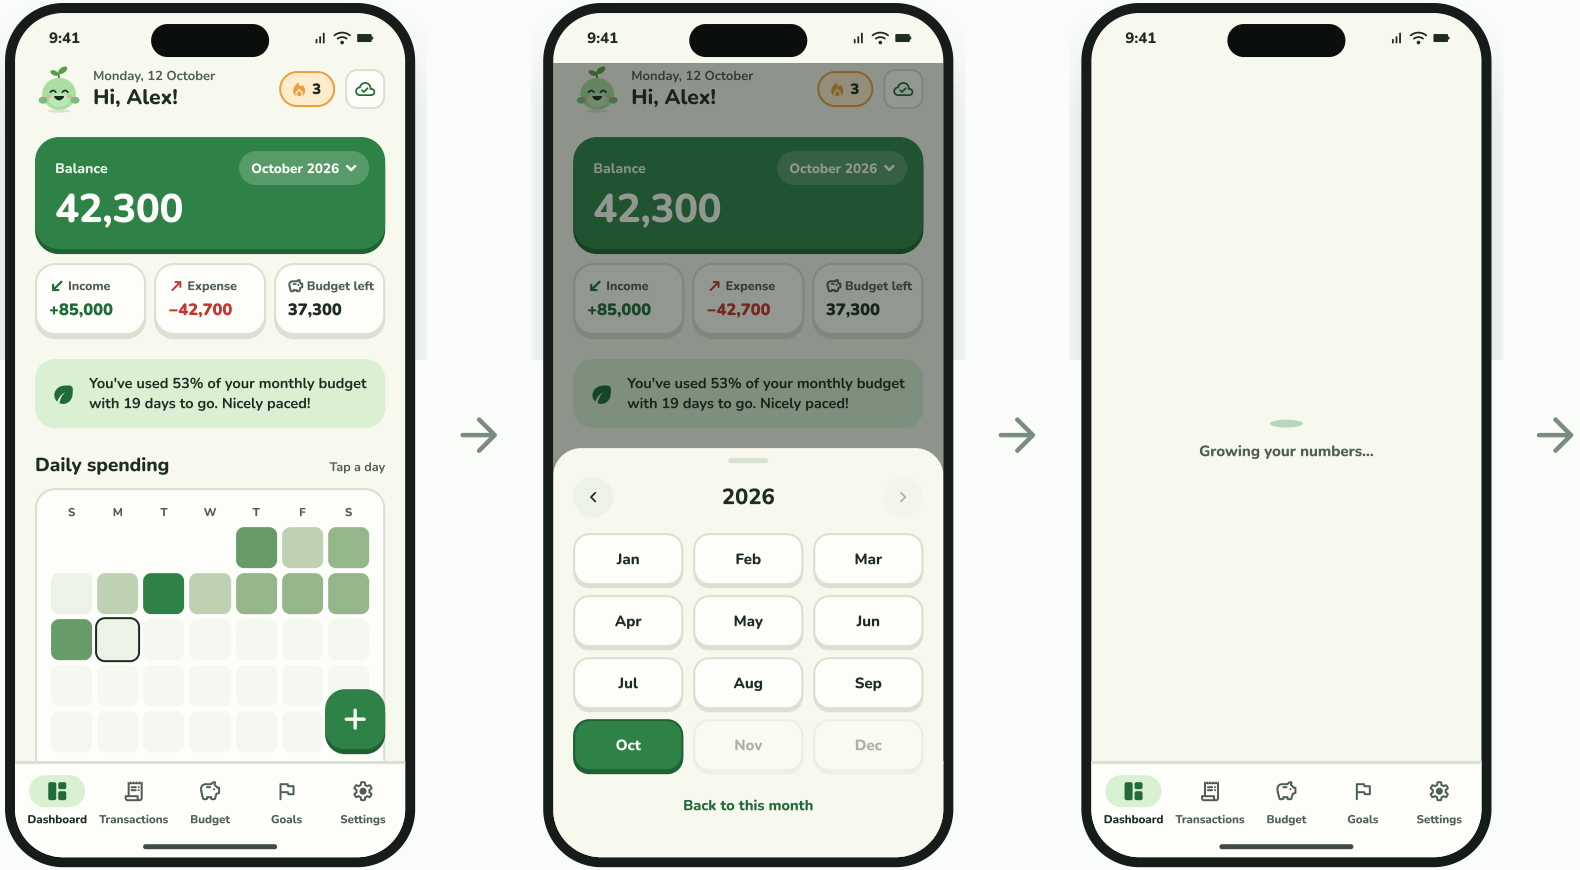

Enter PIN

Wrong PIN

3 · Dashboard

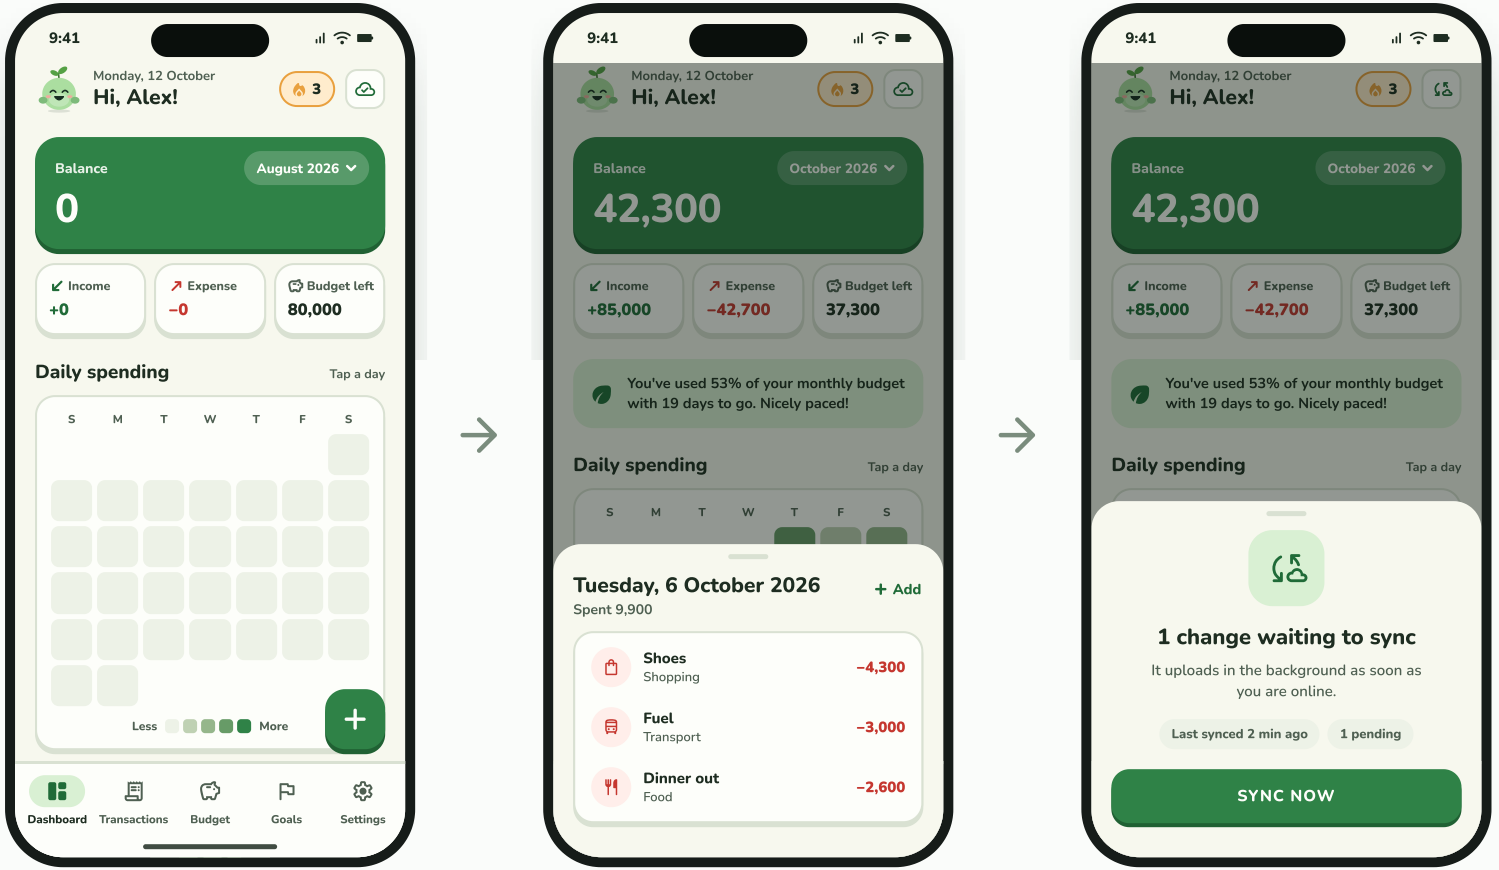

Balance card with the month chip, a three-tile row (income, expense, budget left), Pip's tip, daily spending map, categories, budgets, goals and recent transactions. Changing month shows the sprout loader, then the month's data or an empty state.

Dashboard

Month picker

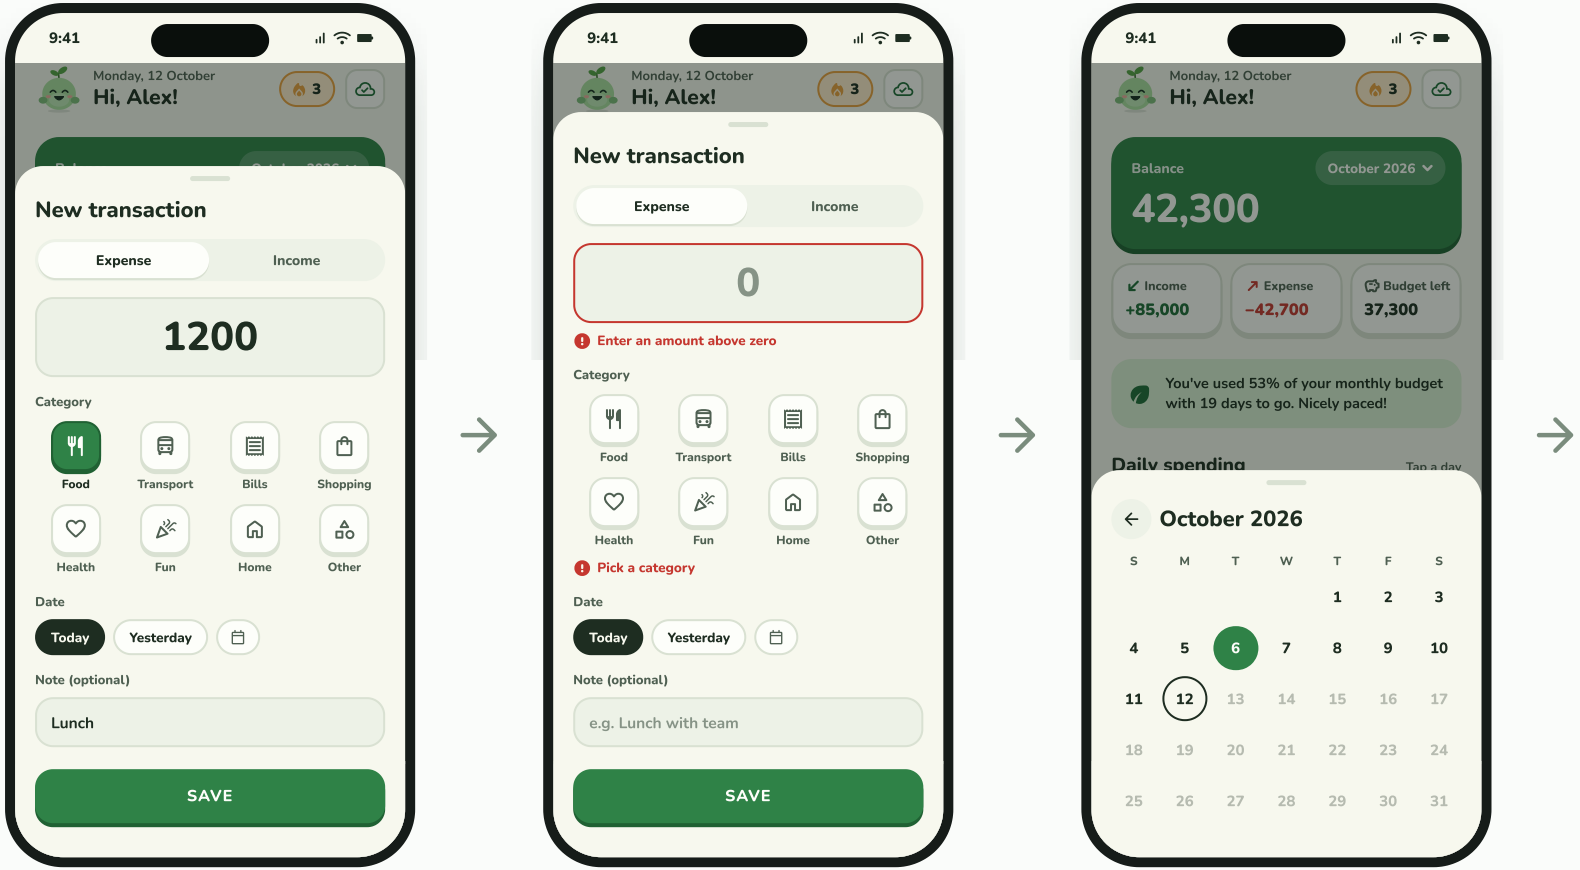

Loading month

Empty month **Day detail** **Sync status**

4 · Logging money

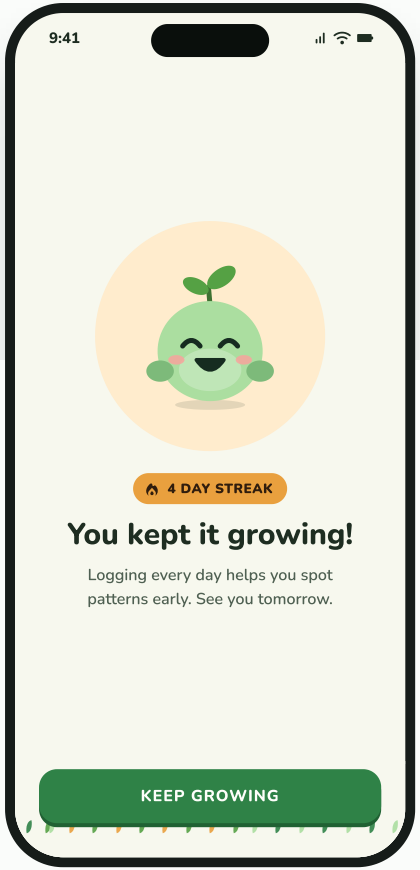

The + button opens the add sheet. Saving triggers the right moment: the first entry of the day grows the streak; crossing 80% of a budget shows a gentle heads-up; crossing 100% shows the over-budget moment. Rows open a detail sheet with edit and delete (with Undo).

5 · Budgets

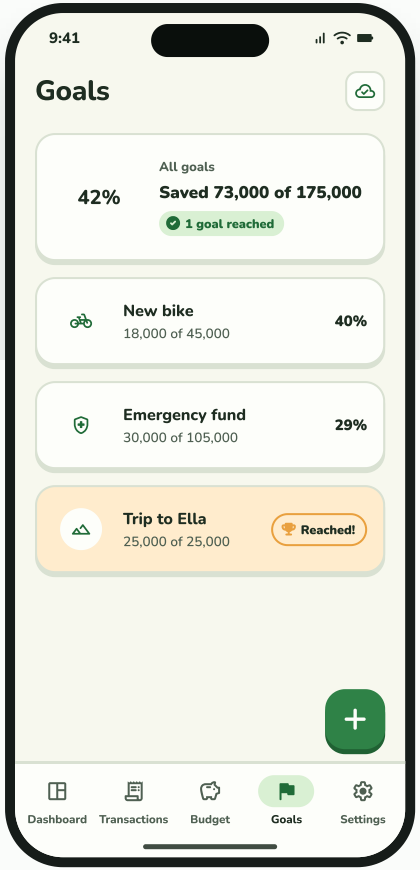

Overall budget and category budgets with sprout-tipped progress bars; the tip droops and turns red when a budget is over. Tap any budget to edit it, or add one for a category without a budget.

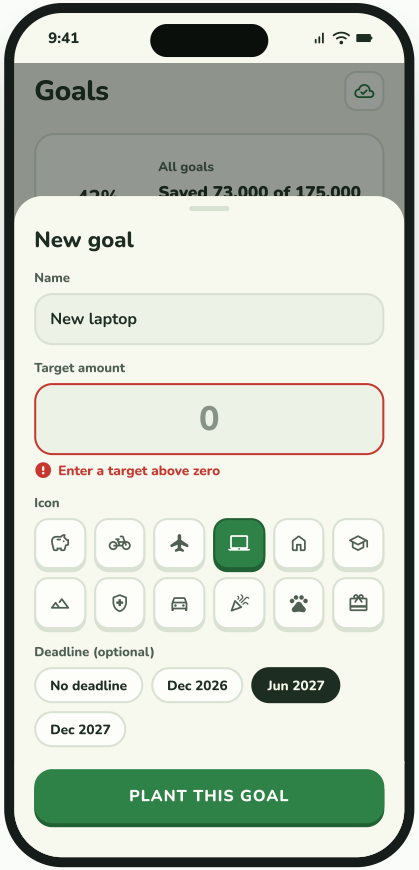

Budget tab **New budget** **Over-budget moment**

6 · Goals

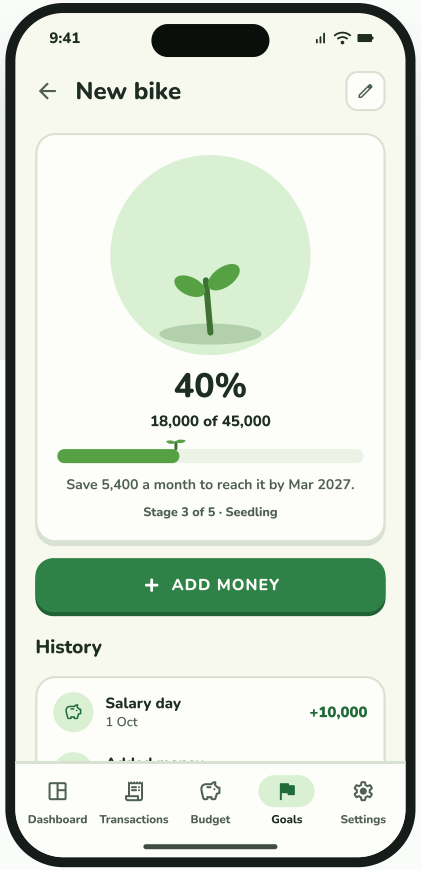

Each goal is a plant that grows in five stages as you save. Adding money that crosses 50% or 100% plays a celebration with falling leaves.

Loading & progress

Every spinner in the app is the sprout loader: a stem grows, two leaves pop open, then it fades and starts again. Progress bars end in a small sprout that droops and turns red when a budget is over.

SPROUT LOADER · PAGE

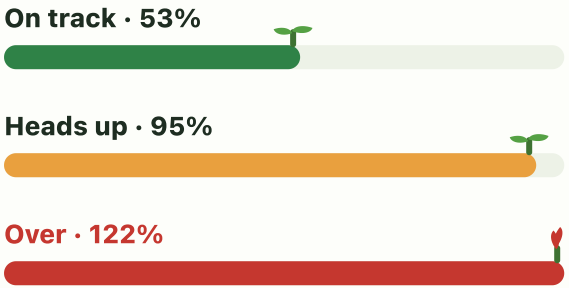

Splash, first sync and month changes.

SPROUT LOADER · IN BUTTONS

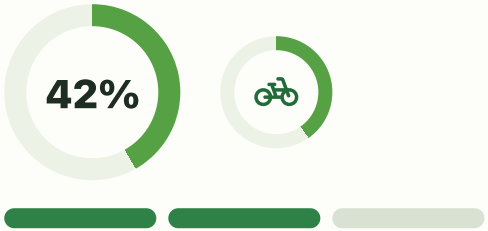

Replaces the label while saving: sign in, save, sync, add money.

SPROUT-TIPPED PROGRESS

RINGS & ONBOARDING PROGRESS

Pip & animations

Pip reacts to what is happening. Goals are shown as a plant with five growth stages. Happy moments drop leaf confetti.

Password and PIN entry

Motion

Bob

Idle breathing on every screen Pip appears.

Jump

Splash, welcome and celebration moments.

Shake

Validation errors, wrong password or PIN, over budget.

Cover eyes

Hands rise over the eyes while a password or PIN is typed.

Leaf sway

Pip’s leaves and goal plants sway gently.

Leaf confetti

Falls behind streak, halfway and goal-reached moments.

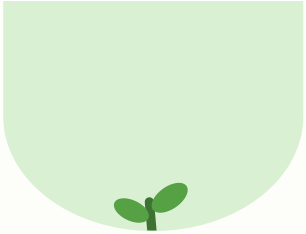

Chunky press

Buttons, keys and tiles sink into their shadow on tap.

4 DAY STREAK

First entry of the day

Pip jumps, leaves fall, the streak chip ticks up.

HEADS UP

A budget crosses 80%

Thinking Pip, amber bar, what is left for the month.

BUDGET ALERT

A budget goes over 100%

Worried Pip shakes, drooping red sprout, offer to adjust the limit.

HALFWAY THERE

A goal passes 50%

The goal plant grows a stage, leaf confetti.

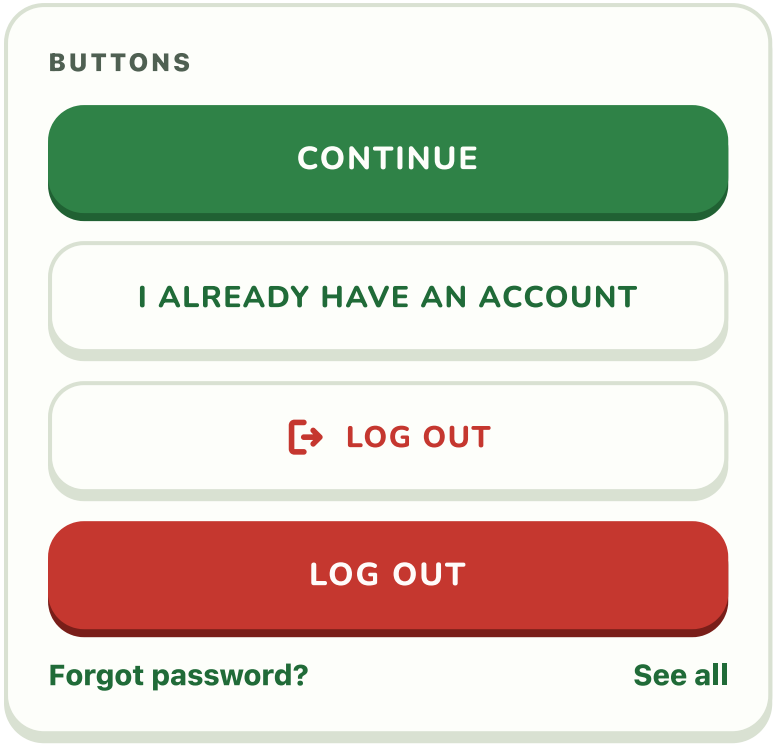

GOAL REACHED

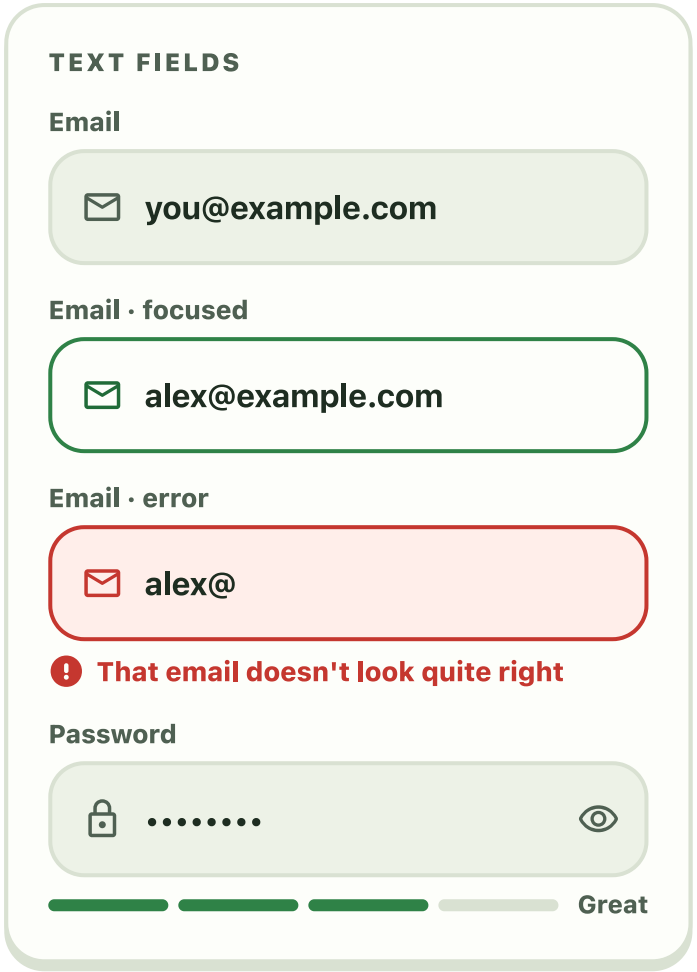

A goal hits 100%

The plant blooms, confetti, “Celebrate”.

Core components

Shared building blocks used across all screens. Meadow light tokens shown; every component also has a dark version via the same tokens.
